Subject: RE: City of Maquoketa TBA Meeting Presentation

Hi Lisa.

There isn't any LR work happening in Maquoketa. I do know that K-State TAB and IDNR has been working with the community on redevelopment planning for a site or sites there.

I participated in a meeting in December with Jen Clancey, Mel Pins and some sort of local planning board in Maquoketa where we talked about EPA, State and TAB redevelopment resources. My sense is that the group we talked to isn't all that interested in using such resources.

Is John Smith's real question, can EPA help with other assistance beyond TBA? I guess we could but would have to get better sense of the needs and that there is a local champion to help us provide resources to meet those needs. You'd also have to find EPA staff to provide the assistance.

David Doyle

Subject: City of Maquoketa TBA Meeting Presentation

Good morning Dave and Jennifer,

I have a meeting with DeAndre and John tomorrow regarding a TBA application from the City of Maquoketa, IA. John Smith wrote an email saying,

"It would be good to hear your thoughts on whether there is something TBA or the larger Brownfields program could do while the removal work is being done, in addition to a discussion as to why the application is not approvable at this time and how you intend to communicate that to the city."

Susan recommended I reach out to you both. Jennifer, could I mention RLF resources are available as long as the site is eligible for the RLF recipient? Is there a better way to say or frame this?

Dave, are you aware of land revitalization work happening in the City of Maquoketa that EPA is involved with?

Thank you both,

Lisa Dunning
